

Guide to the Targets

1. Zip The Ditch - 100% of the frisbee in the 5 metre diameter circle in front of the track marker post east of the DOC office.
2. In A Tube - 100% of the frisbee in or through any of the three culvert pipes. If the frisbee passes completely through and then comes back out, this is OK.
3. Aoraki Splendour - The chain hole target just to the right hand side of the ditch
4. Straight On Through - Face side of the culvert. 100% of the frisbee in the pipe is OK.
5. 3 Poplars And A Pine - The trunk of the large pine tree.
6. Down Pipe Down - The chain hole target in front of the manhole between the two trees.
7. One Way Or Another - Compulsory slalom between the trees in either direction. If you go past the second tree, you have to come back and 'unwind' in the same direction before going through the gap. The frisbee has to land 100% inside the triangular target (front plain) created by the three marked trees.
8. Slightly Bent - The trunk of the large pine tree above and including the chain and the sticky out branch at the bottom of the trunk.
9. Stump Around (blind Tee) - The chain hole target round to the right. (NB This is a right hand dogleg hole!)
10. Switch Back - Through the Y in the birch tree.
11. Dogleg Jungle - Between the small tree and the post.
12. Right On - 100% of the frisbee must pass between the gap created by the middle and right birch trees from either direction.
13. Softly Softly - Hit the chain or go inside the chain around the knot in the tree.
14. Norwester - The chain hole target in amongst the trees.
15. Let It Rip - Any part of the rock including target marker.
16. Nail It - 100% through inner diamond of the Y (the thin gap between two closer trees counts if you get it on the first shot!)
17. The Breeze - In the basket or chains of the chain hole target.
18. Penstocked - 100% through the penstock from either direction.
